MEMORANDUM FOR: Director of Information Technology

VIA: Chief, Printing and Photography Division, OL

UTD

FROM:

Director of Information Resources

STAT

SUBJECT: Secure TV Line Between the Auditorium
and Room 1E60

1. The Visual Media Branch (VMB) of my Office is receiving an increasing number of requests to show presentations originating in the Auditorium in the OIR theaters. Many of the presentations are classified, however, and the line running from the Auditorium to Room 1E60, the OIR technical operations area, is not secure. Therefore, VMB cannot accommodate the requesting officers. It is clear to me that the time has come to secure the distribution line from the Auditorium to Room 1E60. Taking this action will allow Agency speakers to reach a considerably larger audience in the OIR theaters. Securing the Auditorium-Room 1E60 line is also a first step toward reaching virtually the entire Headquarters Building population via the secure TV distribution net, which is currently being planned by your Office.

2. In conjunction with your plans to provide a secure, multi-media communications system for Headquarters Building, I ask that you initiate action to secure the television line from the Auditorium to Room 1E60. [redacted] Chief, Technical Services Section/VMB/OIR, will be the contact point for access to the technical operations area of OIR.
